Hangeul Day

Project @ this address
Code @ this address

Target Users:

Korean citizens, keen to celebrate the birth of their alphabet. **Korean government**, in order to showcase the national alphabet. **Foreigners**, analyzing hangul unique characters.

Visual Concepts:

Calligraphy, animation, illustration.

Features:

The concept created explores the dynamics of **rendering multiple objects**, each with unique features.

The idea has been inspired by the recent celebration of Hangul Day (October 9th), namely the anniversary of the invention of the **Korean alphabet** by King Sejong.

Usage:

The user is free to **click on the canvas**, which will change the size of the text floating nearby, based on its distance from the click point.
